	BandIT XM	Black	One Size	
	<i>Elbow Support</i>			
 <p>The ProBand BandIT XM® is highly effective in relieving pain commonly associated with:</p> <ul style="list-style-type: none"> ▪ Carpal Tunnel Syndrome ▪ Tendonitis ▪ Cumulative Trauma Disorders ▪ Golfers Elbow (Medial Epicondylitis) ▪ Tennis/Pickleball Elbow (Lateral Epicondylitis) <p>The ProBand BandIT XM introduces the use of Magna-Therapy® as an enhancement to the BandIT, and features a unique, non-constrictive design consisting of two soft-plastic plates curved to the shape of the forearm.</p> <ul style="list-style-type: none"> ▪ Wearable Anti-inflammatory™ ▪ ProBand BandIT XM utilizes magnetic pads to enhance natural healing in the area of the elbow. ▪ Stimulates the body's natural healing process by increasing blood flow and oxygen, reducing inflammation and pain, facilitating active decompression of soft tissue irritation. ▪ Leverages Compression Therapy to provide more immediate pain relief, while working with your body's own natural movements to create a pumping mechanism, increasing blood flow and reducing inflammation to improve healing environments. ▪ Plates have soft cushioned neoprene on the insides that rest against the skin. Plates are held together by a single piece of hook and loop strap, which is attached with a metal rivet. 				

- ProBand BandIT XM utilizes Anatomically Focused Dynamic Compression® to turn the natural action of the forearm into a natural pump.

Studies have shown Magna-Therapy to be effective in 70% or more cases and many therapists report the predictability of success with this enhancement to be higher than any other treatment. Risk is low and benefit is high.

When placed near the affected area, magnets may stimulate blood flow with the resultant increase of oxygen-carrying capacity of the blood, both of which are basic and essential to helping the body heal itself.

Although not yet approved by the United States FDA, magnetic therapy is being investigated as a new remedy for many Repetitive Stress Injuries by the National Institute of Health's Office of Alternative Medicine. One size fits most.

BandIT		One Size	
<i>Elbow Support</i>	Black and White		

The ProBand BandIT is highly effective in relieving pain commonly associated with:

- Carpal Tunnel Syndrome
- Tendonitis
- Golfers Elbow (Medial Epicondylitis)
- Tennis Elbow (Lateral Epicondylitis)

The ProBand BandIT utilizes Anatomically Focused Dynamic Compression® to turn the natural action and movements of the forearm into a natural pump. Unlike other bands which create a tourniquet effect and can cause uncomfortable tissue swelling, the BandIT is the only medically designed device which works with the human anatomy to:

- Wearable Anti-inflammatory™
- Stimulates the body's natural healing process increasing blood flow and oxygen, reducing inflammation and pain, facilitating active decompression of soft tissue irritation.
- Superior aid for tennis, golf, weightlifting, bowling, racquetball and activities such as the use of keyboards, which result in Repetitive Stress Injuries (RSIs).
- Aid in the relief of pain and doesn't hamper movement or cause uncomfortable swelling.
- Unlike most generic products, may be worn for long periods of time with complete comfort.
- The BandIT is simple to apply, and it works in a completely new and unique manner.

One size fits most. We can provide customers with a 20" strap instead of the standard 18" strap.

	KneedIT <i>Knee Support</i>	Black and White	One Size	
	<p>The ProBand KneedIT assists in the relief of minor knee pain commonly associated with Repetitive Stress Injuries like:</p> <ul style="list-style-type: none"> ▪ Arthritis ▪ Tendinitis ▪ Chondromalacia (Runners Knee) ▪ Patellar Tendinitis (Jumpers Knee) ▪ Osgood-Schlatter ▪ Osteoarthritis <p>by placing gentle pressure along the medial and lateral soft tissues of the knee.</p> <p>Its innovative design consists of a soft-plastic plate curved to the shape of the knee and a soft pad that straps around the back of the leg.</p> <p>Stimulates the body's natural healing process and provides pain relief by gently absorbing force at the knee and by exerting concentrated compression and warmth across the soft tissue in front of the knee.</p> <ul style="list-style-type: none"> ▪ Wearable Anti-inflammatory™ ▪ Leverages Compression Therapy to provide more immediate pain relief, while working with your body's own natural knee movements to create a pumping mechanism, increasing blood flow and reducing inflammation to improve healing environments. ▪ As you move, it gently applies pressure to the joint liner and patellar tendon and aids in pumping soreness away. ▪ By stabilizing the inferior pole of the patella, ProBand's KneedIT also may improve patellar tracking. <p>The KneedIT enables muscles to relax, which reduces stress on tendons and muscles. It can be worn on the right or left knee and easily adjusts to fit the contour of the patella and patellar tendon.</p> <p>If you want to wear the KneedIT on both knees, we suggest that you get one KneedIT for each leg—as you wear the products, they adjust to the contours of your knee.</p> <p>One size fits most.</p>			

	KneedIT XM <i>Knee Support</i>	Black	One Size	
	<p>The ProBand KneedIT XM introduces the use of Magna-Therapy® as an enhancement to the KneedIT, and features a unique, magnetic device scientifically designed to assist in the relief of knee pain commonly associated with Repetitive Stress Injuries like:</p> <ul style="list-style-type: none"> ▪ Arthritis ▪ Tendinitis ▪ Chondromalacia (Runners Knee) ▪ Patellar Tendinitis (Jumpers Knee) ▪ Osgood-Schlatter ▪ Osteoarthritis <p>By placing gentle pressure along the medial and lateral soft tissues of the knee. Its innovative design consists of a soft plastic plate curved to the shape of the knee and a soft pad that straps around the back of the leg.</p> <ul style="list-style-type: none"> ▪ Wearable Anti-inflammatory™ ▪ ProBand KneedIT XM utilizes magnetic pads to enhance natural healing in the area of the knee. ▪ Stimulates the body's natural healing process and provides pain relief by gently absorbing force at the knee and by exerting concentrated compression and warmth across the soft tissue in front of the knee. ▪ Leverages Compression Therapy to provide more immediate pain relief, while working with your body's own natural knee movements to create a pumping mechanism, increasing blood flow and reducing inflammation to improve healing environments. ▪ As you move, it gently applies pressure to the joint liner and patellar tendon and aids in pumping soreness away. ▪ By stabilizing the inferior pole of the patella, ProBand's KneedIT XM also may improve patellar tracking. <p>Studies have shown Magna-Therapy to be effective in 70% or more cases and many therapists report the predictability of success with this enhancement to be higher than any other treatment. 	Exercise Ball		One Size	
		Black		

The ProBand Therapeutic Exercise Ball enhances the healing process and assists in relieving pain while you wear the ProBand BandIT® and ProBand BandIT XM®

Benefits of the ProBand Therapeutic Exercise Ball:

- Activates and enhances ProBand’s patented technology.
- Decompresses the forearm.
- Increased blood flow & circulation.
- Reduces inflammation and swelling.
- Relieves physical tension, body discomfort, stress & more.

With every squeeze of our ProBand Therapeutic Exercise Ball, working in conjunction with the ProBand BandIT® and ProBand BandIT XM®, you will activate and enhance ProBand’s patented technology: Anatomically Focused Dynamic Compression®.

This activity and action will help you increase blood circulation and reduce inflammation, swelling, and pain while supplementing the oxygen levels inside the body. In combination, these technologies will decompress your forearm, accentuate the natural pumping action of your arm to pump out inflammation at its source, and relieve pain, while also strengthening & conditioning your wrist, elbow, and forearm.

The ProBand BandIT or BandIT XM used together with the ProBand Therapeutic Exercise Ball can help with the healing process of carpal tunnel, tendonitis, and arthritis symptoms. Both products are designed to help rehabilitate the wrist, hand, fingers, elbow, and forearms from repetitive stress injuries like tennis elbow, golfers’ elbow, and other ailments.

The ProBand BandIT and BandIT XM aid in the relief of pain without cutting off circulation, hampering movement or causing uncomfortable swelling. It is also a great wellness tool to bring mindfulness and helps relax your mind and body.

Instructions for use:

With your ProBand BandIT or BandIT XM adjusted correctly on your forearm, place the Therapeutic Exercise Ball into your palm and squeeze for three seconds. We recommend doing this ten times, with one to two seconds in between each repetition. This should total thirty seconds of squeeze time. Feel free to repeat this exercise as many times as is comfortable for you throughout your day.

	Ankle BandIT		One Size	
	<i>Ankle Support</i>	Black		
	<p>The ProBand Ankle BandIT helps:</p> <ul style="list-style-type: none"> ▪ Wearable Anti-inflammatory™ ▪ Can be worn comfortably with shoes. ▪ Relieve pain and swelling often associated with chronic ankle sprains, arthritis, and tendonitis. ▪ Ease discomfort commonly experienced with degenerative joint disease (osteoarthritis) of the ankle. ▪ Also is recommended for individuals suffering from synovitis and plantar fasciitis. ▪ Pumps out inflammation and swelling. ▪ Decompresses the joint <p>The Ankle BandIT features Anatomically Focused Dynamic Compression®.</p> <p>The Ankle BandIT comes with two removable and adjustable compression pads which are anatomically contoured to apply intermittent soft tissue compression to the lining of the ankle joint, thus aiding in the reduction of swelling and pain.</p> <p>Anatomically focused dynamic compression pads should be adjusted diagonally on the Ankle BandIT wrap and applied across the front of the ankle to enable precise ankle pain and swelling relief.</p> <p>One size fits most.</p>
